

Clarkson Technical Services

Technical services

Clarkson Technical Services are based in Dubai/Fujairah, London and Singapore and provide a range of services for the marine and offshore sector.

Our teams are made up of mixed nationalities – from Russia, Poland, Romania, Bulgaria, India, the Philippines and other traditional shipbuilding centres – and all are highly skilled, former shipyard workers. They include riding squads who carry out repairs at sea as an alternative to dry-dock repairs.

Among a comprehensive range of services offered are:

- General ship repairs and up-grading of vessels.
- Project management with turn-key solutions, including class and plan approvals, vessel modernisation, new installations, conversions, compliance new regulations, boiler renewals/repairs, steel renewals, main engine and diesel generator overhauls including crankshaft renewals, turbocharger overhauls, hydraulic systems, cargo pumps and systems.
- Ship inspections, class record inspections.
- UTM / steel specifications, hull and deck repairs.
- Dry-docking and newbuilding supervision.
- Superintendent services.
- Blasting and coatings.
- Class approved SPS (Sandwiched Plate System) of steel repair.
- Reactivation of laid-up ships and provision of delivery crew.

Principal clients include shipowners, ship managers, ship operators and shipyards.
